Garden Seeds

of garden seeds from our stock. There's score of reasons for doing so. We carry every variety of seeds that may be cultivated in this latitude. Whatever seed we have is the best of its kind obtain-able in this country. Every succeeding season, scientific gardners, florists and nurserymen are bringing out new and more valuable varieties of seedlings. which wide awake people will find it advantageous to secure for their gardens. We never fail to get everything new of this kind. For this season our collection of garden seeds is the best in town. Our seed list includes all kinds.

Over 83,000 Sold in 1897-An honest wheel at an honest price: \$90, \$95, \$30 for juve-niles; \$50 for adults; \$75 for tandems and chainless. Call and see sample wheels.

SANTA FE THE LOSER.

Condition of Public Schools Detrimental to the Advancement of the City-Good Men Needed on Board of Education-Some Suggestions.

Editor of the New Mexican. Santa Fe, N. M., March 28, 1898 .- It

government is essential to the prosperity of the town and the comfort of its people. A good set of public-spirited men could revolutionize the appearance of Santa Fe without one dollar of additional expense.

But however important other officials re, a good school board is altogether the most essential thing. Santa Fe is anything else. Apart from their educational importance, we are losing far more than their cost in actual money. Every year a dozen or 20 boys and girls are sent away because we lack proper public schools here. In a number of cases others of the family accompany them. This causes a direct loss to those who supply food, clothes, shoes, etc., and indirectly to every one in the community. Again, dozens of families are annually kept from coming to locate here through lack of proper schools for their children, and others are leaving us to go to more fortunate towns for the same reason. Every one knows cases of this kind. We cannot attract desirable population till we have good schools for the children; that is the first subject of inquiry from every one who thinks of

But these things are too plain for argument; the practical thing is to act. to hear the Denver boys at the court To have good schools we must have a house on Thursday evening, March 31. good board of education and is only to be had by electing the best men. They should be the very best in the community, lov-ers of education, familiar with modern methods, and with public spirit to de-vote themselves to the work. No one is too high or too good for this place, for it is the most important office that we have. The right way would be for the good citizens of each ward, irrespective of party, to meet and select the very best man in that ward and insist on his serving in that office.

But so long as party machinery used here let us insist that each party puts up first-class men; and the way to make that determination felt is by vot-ing for the best man, and resolutely scratching off every inferior name. In that way we can soon teach conventions

o nominate none but the best. to nominate none but the best.

There are plenty of good men in the city for the purpose, such as S. H. Day. Amado Chaves, Geo. H. Wallace, G. W. Knaebel, Jose D. Sena, E. A. Fiske, Judge Emmet, Dr. Harroun, Jose Segura, Grant Rivenburg, W. J. McPherson, A. P. Hogle, C. L. Bishop, Judge Laughlin, C. F. Easley, B. M. Read and a host of others. No one will refuse to serve when he understands that his colleagues when he understands that his colleagues are to be of high character. And the are to be of high character. And the right men can easily be elected, for the people have waked up to the necessity of good schools. Suppose, for instance, the Republican candidates are as follows, who could possibly defeat them? First ward, J. D. Sena: Second ward, Fritz Muller; Third ward, Dr. Harroun or Jacob Weltmer; Fourth ward, S. H. Day. With good candidates we are sure of success; and if we nominate inferior nez, is here after provisions. He is ones they ought to be overwhelmingly registered at the Bon-Ton. ones they ought to be overwhelmingly defeated. Let all good citizens exert themselves to ensure the nomination at St. Vincent's for the past week, is and election of the very best.

COPPER ZONE MINE.

Description of the Property and Vein Matter.

A meeting of the stockholders of the Copper Zone Mining company was held in this city the past week and the following officers and directors elected: President, A. W. Tennant; vice president. A. B. Renehan; secretary and treasurer, C. A. Scheurich; directors, R. citizen of this country, a man of un-W. Sammon and C. L. Hall.

The Copper Zone Mining company owns 14 claims, all patented, in Mora ner, he had a remarkably eventful county, 27 miles northwest of Watrous, in the Guadaloupe mining district, The property is nearly two miles long and 1200 eet wide, with six veins of ore running of company H, First New Mexico volunparallel from 30 to 40 feet apart, the full

ength of the land owned. All the veins show development by shafts varying from 12 to 340 feet in depth, and the mine has paid from the very grass roots. On the surface the veins range from 14 to 20 inches, two and one-half feet at forty in depth, four at 50, four at 140 on one vein, and four and one-half at the bottom of the deepest

shaft, 340 feet. The veins are true fissures, walls even and well defined, with a dip of about

The vein matter is termed "volcanic aud" and is found in almost vertical slate mud" and is found in almost vertical slate trata, thoroughly impregnated with copper glance nuggets, of nodules, varying from an ounce up to several hundred pounds, and running sixty to eighty per cent copper. It is evident these deposits were once in a fused state. In addition to the copper glance, many of the nuggets contain black oxide of copper, but the mass is rich, unique and beautiful. With the nuggets removed, all the remainder of the vein material runs two and one half per cent copper at the sur-

and one-half per cent copper at the surface and ten per cent 140 feet down. The verage of ton lots, from the surface to a depth of 140 feet, returned seven and one-half per cent less nuggets, and fourteen per cent with the latter included. As depth is gained the veins increase steadily in size. The matter becomes richer and the nuggets larger and more numerous.

These high grade nuggets are about in the proportion of one ton in 40, and the vein matter, less the nuggets, will concentrate 15 to one, making a product running 50 to 60 per cent copper. The nuggets are so rich that they are ready or the refinery just as taken out.

For a year past a force of from ten to 15 men has been employed by the com-pany in developing the property; the machinery already in place consists of a large hoister, boiler and 120-horse power engine and a concentrator will e added to the plant at once.

Mr. Tennant informed a New Mex-

ICAN representative that the company push the cross-cutting of he veins from the central shaft, that the work of taking out ore would not be allowed to stop for a moment. The Copper Zone Mining company has its principal office in Santa Fe, and those interested in copper ores can see speci-mens by calling at Mr. Scheurich's place of business on the south side of the

Pension Examining Surgeon. Dr. A. H. VanCleve, of Silver City, has een appointed pension examining surgeon in that town.

New Postoffice.

A postoffice has been established Brazos in Rio Arriba county, with Mathew S. Groves as postmaster.

C. H. Mosher, of New York; E. C. Watson and Thos. McEnery, of New Mexico, have incorporated the Alpha & Omega Gold Mining company, and filed when recruited will not be expected to articles of Incorporation in Secretary Wallace's office. The objects of incorporation are: Buying and selling mining property, stocks and bonds, real estate ores and refining same; buying and sell-ing concentrates, water and water rights, dams and damsites, mills, smeltrights, dams and damsites, mills, smelters, millsites, tunnelsites, placer grounds, and finally to carry on all operations appertaining to general mining and smeiting business; to build and operate stores and carry on a general mercantile business, and to build and operate hotels. Capital stock, \$10,000,000. The operations of the company will be car-ried on in the county of Grant and other counties of New Mexico, in the terri-

tory of Arizona and elsewhere in the United States, with branch offices, and the principal place of business and office is in Deming, New Mexico. THEY RIDICULE IT.

MANY PEOPLE RIDICULE THE IDEA OF AN ABSOLUTE OURE FOR DYS-PESIA AND STOMACH TROUBLES.

Ridicule, However, Is Not Argument and Facts Are Stubborn Things.

Stomach troubles are so common and in many cases so obstinate to cure that people are apt to look with suspicion on any remedy claiming to be a radical, permanent cure for dyspepsia and in-digestion. Many such pride themselves on never being humbugged especially or medicines.

medicines. This fear of being humbugged may be

This fear of being humbugged may be carried too far; so far, in fact, that many persons suffer for years with weak digestion rather than risk a little time and money in faithfully testing the claims of a preparation so reliable and universally used as Stuart's Dyspepsia Tablets.

Now Stuart's Dyspepsia Tablets are vastly different in one important respect from ordinary proprietary medicines for the reason that they are not a secret patent medicine, no secret is made of their ingredients, but analysis shows them to contain the natural digestive ferments, pure aseptic pepsin the digestive acids, Golden Seal, bismuth, hydrastis and nux. They are not cathartic, neither do they act powerfully on any organ, but they cure indigestion on the common sense plan of digesting the food eaten promptly, thorougly before it has time to ferment, sour and cause the mischief. This is the only secret of their success.

Cathartic pills never have and never can cure indigestion and stomach trou-bles because they act entirely upon the bowels, whereas the whole trouble is

bowels, whereas the whole trouble is really in the stomach.

Stuart's Dyspepsia Tablets, taken after meals, digest the food. That is all there is to it. Food not digested or half digested is poison, as it creates gas, acidity, headaches, palpitation of the heart, loss of flesh and appetite, and many other troubles which are often called by some other name.

They are said by drawnists averaging the comments of t

They are sold by druggists everywhere at 50 cents per package. Address Sinari Co., Marshall, Mich., for book on stomach diseases or ask your druggist for it.

WHITE OAKS HAPPENINGS.

Election of Officers of the Company-Brief Death of Jesus Sandoval y Sena, Scout and Guide-Short Biographical Sketch-Patriotism in Lincoln County.

> White Oaks, March 25, 1898,-Jesus Sandoval y Sena died at his home in White Oaks last Sunday morning after an illness of a little more than two weeks. He was an old and respected blemished character and sterling worth. Although of quiet and unassuming man-

career. Entering the service of his country when quite a young man as a member teer cavalry—Kit Carson's regiment—he soon rose to the position of orderly ser-geant of his company which position he held until his discharge at Fort Stanton

After the remnant of General Sibley's command had been driven back over the border too badly demoralized to be a further menace to people of New Mexico, his regiment was stationed at this fort during the last year of its service watching and fighting the Indians who were making frequent raids through the country. During this time Mr. Sena was almost constantly on outpost and scouting duty having many encounters with the wiley red skins, with all the hair breadth escapes which attend that

mode of warfare.

After his discharge from the First cavalry, he was employed by the officers of the government as a guide and scout up to the year 1883. Many times he trailed the war parties to their secret hiding places in the mountains and then led the troops by secret trails to positions which tions which commanded the hostile camps, resulting in an easy capture of the entire band. Especially was this the case in the capture of the Chief Colate and his followers by Lieutenant Cushing in the Gusdalupe mountains. Altogether enough of history and adventure have been crowded into this man's quiet unobtrusive life to rival that

Since he left the employment of the government he has made his home principally in White Oaks where most of his family now live. He has three brothers and one sister living at or near Las Vegas and relatives and friends in Santa Fe and other places throughout

the territory.

The trusted friend of Kit Carson and every other commandant at Ft. Stanton, the daring scout, the honest man and respected citizen, he died as he had lived -one of nature's worthy noblemen. Mr. Sandoval y Sena was a member of Kearney post G. A. R., White Oaks, some member of which was constantly on duty at his bedside during his last

sickness, and his funeral services were conducted by the post.

Patriotism is neither dead nor slum bering in White Oaks as is evinced by the fact that Captain A. W. Kimpton, of this place, who once sailed the salt, salt sea, and served as acting master of a ship in Uncle Sam's employ during the stormy weather from '61 to '65, has offered his services to the secretary of the navy in the event of a war with Spain. navy in the event of a war with Spain. The captain says he isn't much on a bicycle or even on the hurricane deck of a New Mexican cayuse, but let him once more strike the rollicking fo cas'le of a man of war and they will find that his feet have not lost their cunning nor his voice that lurid ring only known to a

Governor Otero that he—the said colonel—be commissioned to recruit a brigade for the impending conflict "be gawd sir." Of course this "brigade," when recruited will not be expected to do any fighting, but will be used by the government to garrison the military posts in the west while the regulars are sont to the front. sent to the front.
